

CARING FOR YOUR NEW TREES

BASIC INFORMATION

Watering by Hand

Water every morning until the basin(s) around the tree(s) are full.

Watering by Drip

If we have installed the drip to your tree, we will set the controller to come on at appropriate times.

Fencing

If you do not have a fenced-in yard, we have installed a fence around your tree(s) to keep the deer out. You will need to keep this up until the tree is fully mature to prevent the deer from chewing on it. If you fence-in your yard including the trees, then you may remove the fence around the tree(s).

Tree Stakes

Plan to keep the trees staked, with its guide wires, for one year.

Please refer to the enclosed publications from Colorado State University Extension Office for additional details on caring for your new trees.

Please contact us if you have any questions about your new trees or the drip system installed to them.
